

Transporting the platform

When the Falcon is placed on a truck, it MUST be securely strapped. Please follow the procedure.

The Falcon must be strapped in both front- and rear end from both sides (left and right). If possible also strap the platform at the middle. Remember to strap the platform on both sides.

Strap 1 - Strap the Falcon in the **rear end** by the fixing points and to a fixing point at the truck.

Strap 2 - Strap the Falcon in the **front end** by the fixing points

Strap 3 From the two fixing point on the belts to a fixing point at the truck
